

We believe 24x7x365 service should be handled by Network Administrators, not a "help desk", so answers are given promptly and accurately. E-mail support should be handled within a half an hour or less, not a couple of days. We at SOS Media Group believe "good service keeps customers, not contracts," and we follow that by not having any contracts on our standard shared and dedicated server accounts. Uptime at or above 99.5%. Prices are based on **Yearly** payments.

### standard value hosting plan
